

Change Management[®] Certification

Develop your skills in planning,
implementing, and managing change

Improve your ability to plan, implement, and effectively manage the impact of change

Today, organizations are constantly changing. This can pose challenges, but also presents opportunities. By effectively managing change, organizations can enhance their performance and achieve their objectives.

Our Change Management courses are designed to assist organizations and their people to manage the impact of change. These courses provide techniques to effectively plan and implement successful transformation initiatives.

Understanding the impact of change is crucial for effective management. Change can lead to either positive or negative outcomes. It can result in increased productivity, improved morale, and new opportunities, or it can cause stress, anxiety, and resistance.

Our Change Management training explores how change impacts and is influenced by individuals, teams, change leaders, and entire organizations.

The APMG Change Management Foundation and Practitioner courses are endorsed by the Change Management Institute, the authors of the Change Management Body of Knowledge (CMBok™) — an excellent guide on the knowledge needed to effectively manage change. These Change Management courses are also an accepted pathway if you are applying to the Change Management Institute's Accredited Change Professional scheme.

Our courses assist those responsible for change initiatives to:

- Help people overcome their resistance to change and embrace new ways of working.
- Identify and engage with key stakeholders throughout the change process to gain support.
- Utilize a variety of proven methods to ensure a smooth and effective implementation of change, thereby accelerating the progress of change programs.
- Highlight their contribution as change professionals to various initiatives.
