Learn how to apply the leading framework for Agile project management

Agile methods have revolutionized projects by emphasizing flexibility, collaboration, and customer centricity. Agile practices advocate for iterative progress, frequent reassessments, and the ability to pivot swiftly in response to changing circumstances.

AgilePM training and certification is based on the AgilePM Reference Book, published by the Agile Business Consortium.

The Reference Book offers a practical and repeatable framework that achieves an ideal balance between the standards, rigour and visibility required for good project management, and the fast-pace, change and empowerment provided by Agile.

Approved AgilePM training services are available globally via APMG's network of accredited training providers.

Accredited training & certification will help individuals to:

- **Deliver change faster and more effectively** by implementing a tried and tested approach to agile project management.
- **Gain a deep understanding** of agile project management principles, concepts and processes, and how to apply them to deliver maximum value for successful projects.
- **Enhance your ability** to facilitate better interaction between stakeholders, developers, and project teams, ensuring clear understanding and alignment.
- **Position yourself** as a key player in agile projects, capable of driving project success through insightful management and leadership.
- **Use agile principles** to enhance collaboration, innovation, and efficiency, ensuring your projects meet and exceed stakeholder expectations.
- **Deepen your understanding** of advanced agile frameworks, improving your ability to adapt and succeed in rapidly changing project environments.
- **Enhance your CV** and boost future employment prospects.

Since its introduction in 2010, AgilePM has fast established itself as the leading framework and certification for agile project management.

Who Is It For?

AgilePM certification is designed for project professionals and team members wishing to adopt a flexible, collaborative approach to project management, whilst improving standards, quality and pace of delivery.
