

# APMG Lean IT Certification

A streamlined approach to optimizing IT operations

# Banish wasteful practices

For more effective IT services choose our  
Lean IT certification.

Lean IT is the extension of lean manufacturing and lean services principles applied to the development and management of information technology (IT) products & services.

**Lean IT's core concern is the elimination of waste, where waste is work that adds no value to a product or service.**

Consultants and evangelists for Lean IT identify an abundance of waste across the business service "production line", including legacy infrastructure and fractured processes.

By reducing waste through application of lean strategies, CIOs and CTOs from companies around the world are driving IT from the confines of a back-office support function to a central role in delivering customer value.

## Lean IT certification helps individuals to:-

- ▶ Be familiar with and have knowledge of the basic concepts of Lean and its core principles;
- ▶ Be familiar with the use of several Lean IT analysis tools;
- ▶ Have an insight into what Lean IT can mean for an organization;
- ▶ Have an understanding of the application of the Lean philosophy in an IT environment;
- ▶ Be able to apply the principles of Lean IT practices under the guidance of a Lean expert.

Many organizations have adopted Lean IT in order to increase customer satisfaction and to achieve greater strategic and financial value.

## Who Is It For?

Our Lean IT certification is designed for any manager or specialist working in an IT organization that could benefit from the principles and insights of the guidance.

## Qualifications Available

- ▶ Foundation (multiple-choice)
- ▶ Kaizen (multiple-choice)
- ▶ Leadership (multiple-choice)
